Subject: HGY/2026/0343- Bruce Castle Park Lordship Lane London N17 8NU

Hi Kwaku,

Regarding the above proposal I have no initial objections.

A tree protection plan clearly shows the protecting fence line, access, and egress from the site (see below).

Any storage, mixing, or plant machinery, will be required to be done on the hard stand.

An ecology and BNG report have been submitted and are satisfactory. Bat and bird boxes are to be installed to maintain and improve biodiversity.

Landscaping is to provide four new trees. We will require, a specification, species, and aftercare programme to establish independence in the landscape for these new trees.

We will require method statements for the installation of the floodlighting and lighting that are within the root protection areas of the trees within the vicinity.

Until the above issues are fully addressed, I cannot fully support the application.

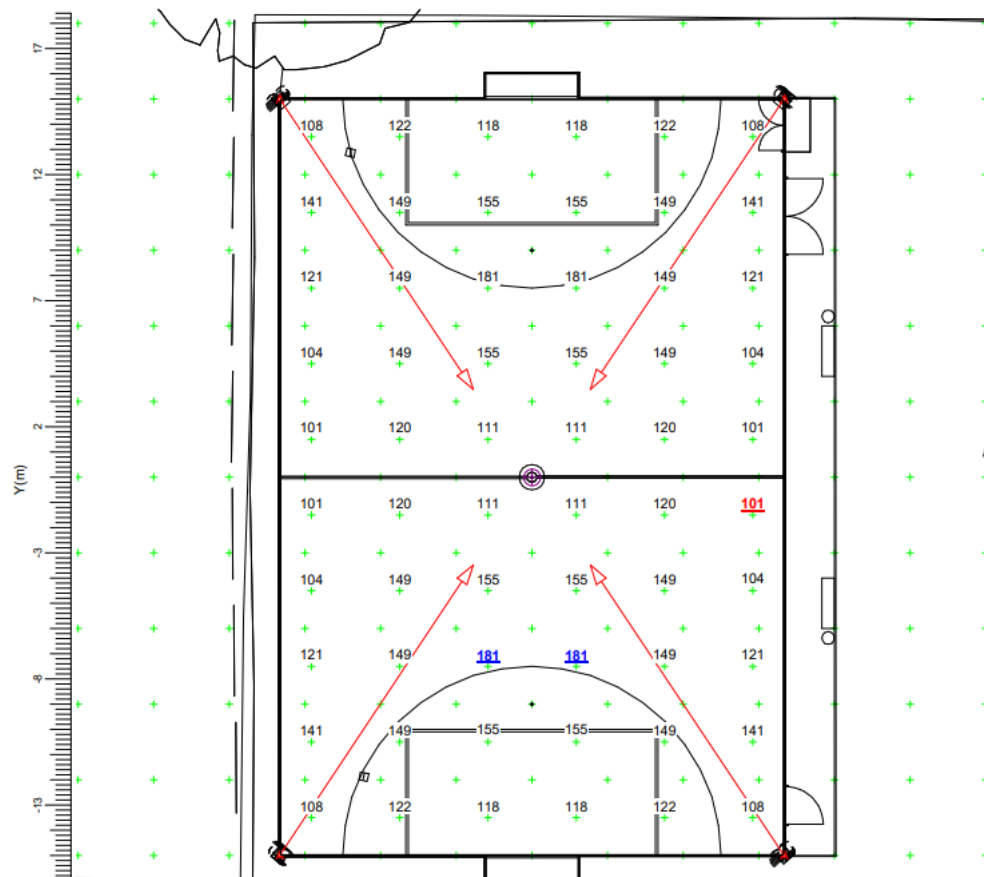

SITE ACCESS & SET-UP PLAN:

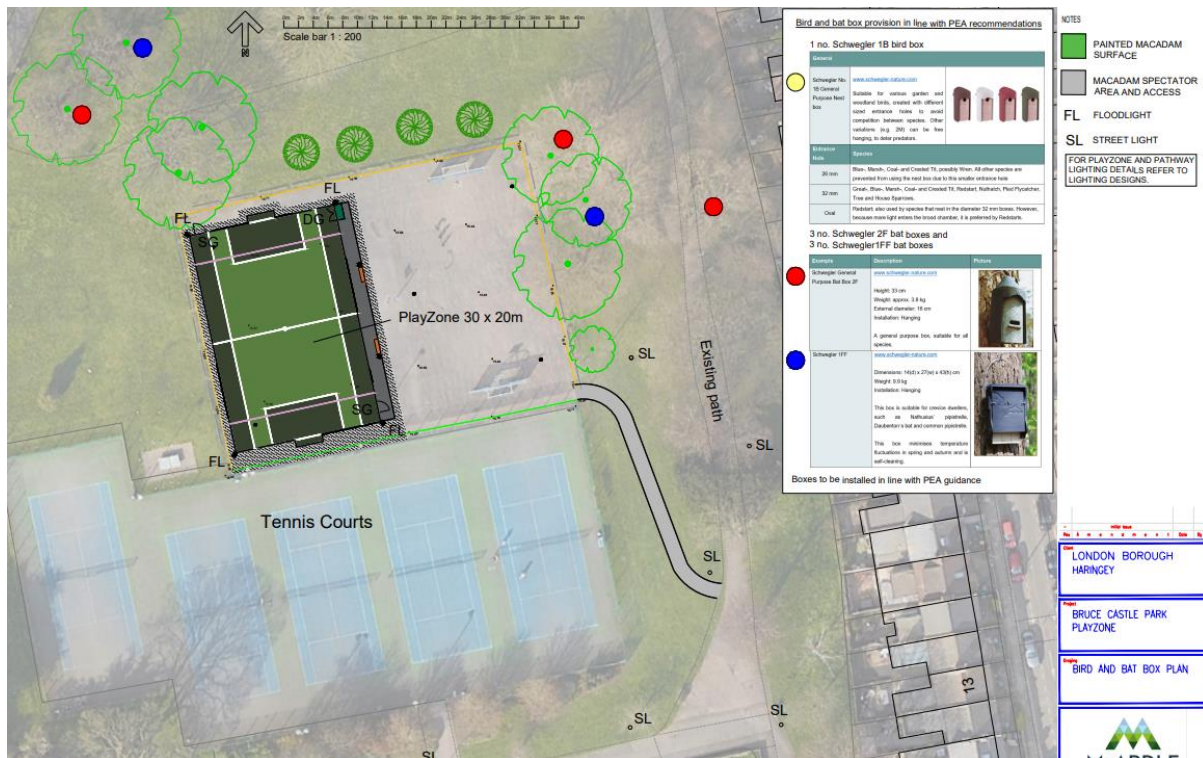

3.1 Five-a-side Football-LED: Graphical Table

Grid Calculation : Five-a-side Football at Z = -0.00 m
: Surface Illuminance (lux)

Regards,

Daniel Monk
