Site

The trees, as listed above, marked on the sketch plan, and seen in the photographs, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 and T2- two Lime trees- Pollard back to main trunk

T3- Eucalyptus tree- reduce height by approximately 1.5m

Issues

I hold no objections to the reasonable proposed pruning works.

The limes are repeat regular pollards, and the Eucalyptus is a young low-grade tree.

The specification is within standard good arboricultural practice and husbandry.

Both species generally respond well from such reduction works and management regimes.

Recommendation

No Objection
