Site

The mature Fig tree T1, as seen in the photograph, and marked on the plan, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Muswell Hill Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Rear garden: Fig (T1) - reduce crown back to previous most recent cuts (1m off).

Reason: to allow more light into the garden

Issues

I hold no objections to the reasonable repeat proposed pruning works to prune back to the recent previous points.

The specification is within standard good arboricultural practice and husbandry.

The species generally responds well to such reduction works and management regimes.

Recommendation

No Objection
