

Ordinance Survey Plan Published 1955

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, London, and published between 1840 and 1854. The 1:2,500 scale was adopted for mapping urban areas and by 1854 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordinance Survey Plan

Published 1970 - 1979

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey archives in the 1970s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1856 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of Unpublished Survey Information

Published 1973 - 1977

Source map scale - 1:1,250

SUS maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

The SIM cards (Ordinance Survey's 'Survey of Information on Microfilm') are film maps of the United Kingdom, which are updated annually. The maps published between the main editions as an area was updated. They date from 1947 to 1994, and contain detailed information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data Published 1991

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SMI cards (Ordnance Survey's 'Survey of the Great Britain' series) in 1992, and were produced until 1993. These maps were the forerunners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.
