Tree Inspector	DM	Date: 1 st May 2026

Site

The trees, as listed above, and marked on the plan, are situated in the rear and front garden of the property. They are not publicly visible to the rear.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

G1 - x1 Maple tree, x1 Leyland Cypress - Cut back and crown lift Leylandii and adjacent Maple to create clearance from Japanese Maple.

T2 - Corkscrew Willow tree - Remove major deadwood, remove snapped branch and reduce over long lateral limb to shape.

G3 - Mixed species coniferous hedge - Fell yew to ground level, fell Thuja to ground level, sever Ivy, prune out dead growth, fell Rhododendron, and prune hedge to shape.

T4 - x1 Japanese Cedar tree - Crown lift to 2 metres

Issues

I hold no objections to the reasonable proposed pruning works.

The fells are low value specimens not worthy of further protection.

The remaining specification is within good arboricultural practice and husbandry.

The applicant intends to re plant the removals with 1 x *Celtis australis* and 5 x *Betula nigra*.

These are suitable species for the location.

Recommendation

No Objection
