Due to the amount of Ivy in the tree, there is very little live branches visible. Proposing to remove this stem in order to prevent it falling (T2) Sycamore - Tree is growing approximately 4m from the rear of the property, lateral branches are beginning to encroach on building. Proposing to reduce approximately 5x lateral branches that are growing towards building by up to 2m. Pruning cuts of approximately 30mm diameter. This is to give 3m clearance from rear windows

Site

The trees, as listed above, seen in the photographs, and marked on the plan, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.
