Site

The mature Ash tree, as marked on the plan, and seen in the photographs, is situated in the front grounds of the estate. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The tree is protected by a Tree Preservation Order (TPO)

Proposal

Tree works proposed.

Works to tree protected as part of a Group TPO.

Ash - *Inonotus hispidus* (Fungus) located on main stem(s) of tree.

Crown reduce the height by 4.5m

Crown reduce the spread to balance and shape by reducing branch lengths of up to 3.5m

Remove dead wood

Issues

I hold no objections for the reasonable proposed pruning works and for the reasons stated.

The reduction is measured and taken from the tips of the branchlets.

The Ash is co- dominant and showing signs of die back in the upper crown.

The species generally responds well to reductions and such management regimes.

Recommendation

No Objection
