Tree Inspector	DM	Date: 17 th June 2026

Site

The mature Chestnut tree, as marked on the plan, and seen in the photograph, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The tree is protected by a Tree Preservation Order (TPO)

Proposal

Tree works proposed.

Chestnut Tree - Crown Reduction

Reduce the crown of the mature Chestnut tree on all aspects back to suitable growth points and previous pruning points where appropriate, in order to reduce end-weight, improve crown balance, reduce wind loading, and maintain the long-term health and structural integrity of the tree

Issues

I hold no objections to the repeat reasonable reduction works to prune back to the most recent previous pruning points.

The specification is within standard good arboricultural practice and husbandry.

The species generally responds well to such crown reductions, and management regimes.

Recommendation

No Objection
