Site

The Sycamore T1 and Laurel T2 trees, as marked on the plan, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 – Sycamore (*Acer pseudoplatanus*) located in the north-east corner of the rear garden. Reduce crown by up to 2 metres and remove dead, damaged and crossing branches.

T2 – Cherry Laurel (*Prunus laurocerasus*) located in the south-east corner of the rear garden. Reduce and reshape by up to 2 metres to maintain size and contain growth within the garden boundary.

Works proposed to improve tree management, maintain appropriate clearance from neighbouring properties and prevent excessive encroachment

Issues

I hold no objections to the proportional care and reasonable pruning tree works.

The specification is within standard good arboricultural practice and husbandry.

Both species generally respond well to such management regimes.

Recommendation

No Objection
