

PROTECTED TREE REPORT (TREE WORKS)

Haringey Council, L4,
Alexandra House, Station
Road N22 7TY

Application number	HGY/2026/1705
Application type	Conservation Area Notification
Site Address:	6 Cumberton Road, Tottenham, London, N17 7PA
Proposal	<i>One tree (tree 1 in sketch) is a 6m loquat tree. We wish to crown thin by 10% and remove the lowest hanging branches. Please see sketch which marks the crown reduction and branch uplift in red. We'd like to remove the lowest branches as it is below standard head height which limits usage of the garden. We would like to thin for general maintenance and allow more light into the garden. The 6m height will be maintained. The tree is located in the rear garden as identified on the sketch provided.</i> <i>We also wish to completely remove a bay tree (tree 2 in sketch) in the front garden on the border with 4 Cumberton Road (who has also agreed to the removal). The tree is invasive and will cause subsistence to the house, as it is growing into the houses. Additionally, it blocks light to the houses. This will be replaced in the same location with a privet hedge to bring it in line with the conservation area requirements. The intention is for this to grow to a height in line with the other hedges on the front of the properties</i>

RECOMMENDATION:	No Objection	
Application date	16/06/2026	
Tree Inspector	DM	Date: 9 th July 2026

Site

The Loquat T1 and Bay T2 trees, as marked on the sketch plan, and seen in the photographs are situated in the rear and front gardens of the properties. They are not publicly visible to the rear.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the White Hart Lane Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

One tree (tree 1 in sketch) is a 6m loquat tree. We wish to crown thin by 10% and remove the lowest hanging branches. Please see sketch which marks the crown reduction and branch uplift in red. We'd like to remove the lowest branches as it is below standard head height which limits usage of the garden. We would like to thin for general maintenance and allow more light into the garden. The 6m height will be maintained. The tree is located in the rear garden as identified on the sketch provided.

We also wish to completely remove a bay tree (tree 2 in sketch) in the front garden on the border with 4 Cumberton Road (who has also agreed to the removal). The tree is invasive and will cause subsistence to the house, as it is growing into the houses. Additionally, it blocks light to the houses. This will be replaced in the same location with a privet hedge to bring it in line with the conservation area requirements. The intention is for this to grow to a height in line with the other hedges on the front of the properties

Issues

I hold no objections to the reasonable pruning (the specification is within good arboricultural practice and husbandry), the removal of the unsuitable Bay tree, and the re planting of a more manageable privet hedge row.

Recommendation

No Objection
