Site

The mature Birch tree, as marked on the sketch map, and seen in the photographs, is situated in the front grounds of the property. It is publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

A 2- 3m crown reduction to the height is more appropriate to take some weight out of the tree and reduce the sail area (as marked out with the red line

Issues

The specification has been changed as the original proposed reduction was seen as too excessive (the black mark in the photograph below).

The specification has now been changed as above and to the red mark on the photograph below.

The Birch was struck by a high vehicle with the current development occurring across the road.

The Birch has good vigour and vitality and should put good wound wood on. The tree will need regular inspections.

Recommendation
