Description

The Eco Two Tier Cycle Shelter is a single-sided, free-standing bike shelter with a modern, sustainable design. Supplied with two-tier racks, this shelter offers an efficient and eco-friendly solution for parking multiple bikes outdoors under a protective roof. It is floor-fixed as standard, with options for casting in or bolting down for added flexibility.

The Eco Two Tier Cycle Shelter is designed to combine practicality and sustainability. Its freestanding, single-sided structure features premium wood cladding for a natural aesthetic and offers the optional addition of a sedum roof, providing green coverage that benefits both the environment and urban spaces. This shelter is available in various sizes to suit a range of needs, making it a versatile choice for urban, educational, and commercial settings.

A key feature of this shelter is its double-stacked bike storage racks, which maximise space and allow for parking twice as many bikes within the same footprint. The two-tier racks are simple to use and include a gas strut to make lifting bikes to the upper tier easy and effortless.

Options:

Our standard configuration provides space for 20 bikes – 10 on the lower and 10 on the upper tier; however, custom sizes are available to meet specific requirements. The shelter includes the choice of a sedum roof for an eco-friendly touch, or other standard roofing options. Additionally, the metal frame is available in galvanised, powder-coated, or both galvanised and powder-coated finishes.

Eco Two Tier Bike Shelter DWG / CAD Files

[Download our CAD files](#) or contact us for help with planning. We also have an in-house designer who can check and assist with any architectural drawings free of charge.
