

PROTECTED TREE REPORT (TREE WORKS)

Haringey Council, L4,
Alexandra House, Station
Road N22 7TY

Application number	HGY/2026/2211
Application type	Conservation Area Notification
Site Address:	222 Archway Road, Hornsey, London, N6 5AX
Proposal	<i>1 x Ash tree – Reduce the overall crown by approximately 20–30%, equating to around 2–3 metres, pruning back to suitable growth points while retaining a balanced and natural canopy shape. Remove any dead, damaged or crossing branches as necessary.</i> <i>All works are to be carried out in accordance with BS 3998:2010 – Tree Work Recommendations.</i> <i>Justification</i> <i>The tree has become excessively large for its position and is significantly restricting natural light into the property. The proposed crown reduction will reduce the overall size and spread of the canopy, improve light penetration and manage the tree at a suitable scale for its location, while retaining its long-term health, structure and amenity value</i>

RECOMMENDATION:	No Objection	
Application date	04/08/2026	
Tree Inspector	DM	Date: 24 th August 2026

Site

The early mature Ash tree, as marked on the plan, and seen in the photographs, is situated in the rear garden of the property. It is publicly visible from Northwood Road N6.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

1 x Ash tree – Reduce the overall crown by approximately 20–30%, equating to around 2–3 metres, pruning back to suitable growth points while retaining a balanced and natural canopy shape. Remove any dead, damaged or crossing branches as necessary

All works are to be carried out in accordance with BS 3998:2010 – Tree Work Recommendations

Justification

The tree has become excessively large for its position and is significantly restricting natural light into the property. The proposed crown reduction will reduce the overall size and spread of the canopy, improve light penetration and manage the tree at a suitable scale for its location, while retaining its long-term health, structure and amenity value

Issues

I hold no objections to the reasonable proposed running works.

There is a kink and seam in the main trunk from the bottom up to >1m.

The tree also could dominate the space.

The specification is within standard good arboricultural practice and husbandry.

The species generally responds well from such reductions and management regimes.

Recommendation

No Objection
