

Front Elevation

Rear Elevation

Notes:

Existing front and rear windows are single glazed casement style timber framed windows.

GENERAL NOTES

1.This drawing is copyright, no part of this drawing is to be copied or used unless written consent is given by Archway Building Consultancy.

2. All discrepancies are to be reported immediately to the project coordinator or lead client representative.

PLANNING SPECIFIC NOTES

1. All works are to comply with the latest Building Regulations and British standards, whether noted or otherwise in these drawings.

2. The contractor is responsible to ensure that all works are compliant with the existing Fire Strategy for the building and to comply with all current Building Regulations (Approved Documents).

3. The windows to habitable rooms are to meet egress requirements 450x450 minimum opening along with all other aspects of Building Regulations (Approved Document B). This should include for any maximum window opening heights to allow for means of escape.

4. All spandrel panels to buildings are to meet minimum A1/ A2 classification, unless single or two storey and specifically agreed with the client or project fire engineer.

5. The planning drawings are to be developed by the chosen window manufacturer and approved by the client team prior to commencing any works or material orders. The manufacturer is to develop the planning drawings ensuring compliance with current guidance.

6. The contractor is to consider smoke extract as part of their final designs and to agree with the client or project fire engineer any automatic opening vents to windows or louvres required to achieve smoke extract in stairwells or the means of escape.
