Subject: Tree removal at 221 Philip Lane N15 4HL

Hello Mr Argles

In accordance with our discussion please find attached support information to remove the tree from the rear garden at 221 Philip Lane . It is a plum tree about 35 years end has been slowly deteriorating for the last 2 years and this year has in fact shown it is beyond any meaningful reason to retain it . It does not pose a health and safety danger to life or property as it is well managed in its location , however I believe due to the current condition there are dry branches at high level which will indeed fall . I hope the photo shots will help you assess your analysis , please let me know if these are sufficient for your needs

Regards

Mike Adamson
