xiii) Method statements and material specification for both proposed repair and alteration works to retained cornices, staircases, fireplaces, doors, windows, panelling and all surviving 18th and 19th Century elements. Trial samples of cleaning and material samples of integrations and replacement works to be approved on site

xiv) Method statement and material specification for reinstatement of fireplaces

(c) The relevant work shall be carried out in accordance with such approved details and method statements."

The following information is enclosed in support of the application:

- Approval of details Application Form
- This Cover Letter
- Heritage Letter, ref. 2607.1987.
- Internal Wall Type Plan, ref. 179-F3A-B3-01-DR-A-22426 C01.
- Internal Wall Type Plan, ref. 179-F3A-B3-02-DR-A-22427 C01.

- Reflected Ceiling Plans, ref. 179-F3A-B3-01-DR-A-35233 P01.
- Data Sheet ref. 179-F3A-B3-01-DR-A-76270 P03.
- Fireplace Remedial Plan.
- 819 Fireplaces – McAleer & Rushe.

Condition 8 has previously been discharged (ref. HGY/2024/3195), however upon carrying out the remediation works to the property, it became apparent that the ceiling located within the first-floor bedroom of 819 High Road has been subject to long-term water ingress and is in poor condition.

As such, this application seeks to partially discharge Parts (b) ii), iii) and xiv), referenced in the above condition wording in bold.

During the approved restoration works, opening up and close inspection revealed that the ceiling had been materially weakened by long-term water ingress. Its condition was recorded photographically, and attempts were made to retain and consolidate the surviving fabric. Further detail of these attempts are set out with in the enclose Heritage Letter. Notwithstanding those interventions, part of the ceiling collapsed.

The removal of original fabric from the listed building would ordinarily require Listed Building Consent, however in this instance, the removal was not a pre-planned intervention as the works were being undertaken to restore the ceiling, with its true identity becoming fully apparent upon partial collapse. Section 9(3) of the Planning (Listed Buildings and Conservation Areas) 1990 Act recognises that works to listed buildings may be urgently necessary in the interests of safety or health, of which the above falls squarely within.

It is not safe to retain or salvage the remaining plaster work of the ceiling, and its removal was necessary and proportionate to the immediate risk, which is capable of full and appropriate restoration through like-for-like reinstatement. The proposed reinstatement will accurately replicate the original ceiling in its construction, materials, profile, texture and finish, while retaining and protecting all sound adjoining historic fabric. Photographic evidence and plans have been provided which set out the extent of the restoration, partial collapse and works for reinstatement.

During the same programme of restoration works, two fireplaces have been uncovered to Level 1 and 2. The fireplaces were recorded and photographic evidence has been provided. These will be retained and fully restored, in line with the provided method of restoration.

I trust that the above is acceptable and I look forward to receiving confirmation of validation in due course. Should you require any further information, please do not hesitate to contact me.

Yours sincerely

Laura Young
