To Whom It May Concern

Full Planning Application ref.HGY/2026/2421, Ashley Park: Shared living block elevation change – submission of updated drawings and documents

On behalf of our client, Re:shape T Ltd (the Applicant), we enclose with this letter amended application documentation to supersede previous iterations submitted as part of planning application ref.HGY/2026/2421 for full planning permission for a phased mixed-use development at Ashley Park, former Ashley House site, Ashley Road, Tottenham Hale N17 9LZ.

The submitted drawings did not show a thin mullion (structural window divide) that is required on the elevations of the shared living building. The mullions are needed for management and maintenance purposes, as has been stipulated by the Applicant’s delivery and construction advisors, and therefore must be shown on the submitted drawings.

The following drawings have therefore been updated, and are enclosed to supersede the previously submitted versions:

--	-------------------------------------	--

For the avoidance of doubt, these are minor amendments which are considered *de minimis* in nature. They are submitted for completeness and do not alter any of the reports or assessments submitted with the application.

For consistency, the following documents have been updated to include the amended drawings and elevations, and are enclosed to supersede the previously submitted versions:

- 1 Environmental Statement Volume 1 Chapter 4: The Proposed Development;
- 2 Townscape and Visual Impact Assessment: Volume 2 of the Environmental Statement; and
- 3 Heritage Impact Assessment.

Please note that there have been no changes to the text in any of the documents, given that the changes to the elevations do not have any impact on the assessments/conclusions.

We trust that the changes are clear. Please do not hesitate to contact me or my colleagues Ben Kelway or Amy Jones if you have any queries.

Yours faithfully
