Site

The various trees as listed above, and marked on the plan, are situated in the front garden of the property. They not publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (24/09/2026 at approximately 1:36pm).

The location is also within the Stroud Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 Oak reduce overall canopy size by 1.5 m and remove rose from canopy. To maintain size

T2 Oak reduce overall canopy by 1.5m to maintain size.

T3 Lime reduce overall canopy by 2m to maintain size

T4 Lime reduce overall canopy by 2m to maintain size

Issues

I hold no objections to the reasonable proposed pruning works.

The Oak trees have been reduced before and the Lime trees are pollards.

The specifications are within good arboricultural practice and husbandry.

The species generally respond well to such reductions and management regimes.

Recommendation

No Objection
