

PROTECTED TREE REPORT (TREE WORKS)

Haringey Council, L4,
Alexandra House, Station
Road N22 7TY

Application number	HGY/2026/2529
Application type	Conservation Area Notification
Site Address:	120 Crouch Hill, Hornsey, London, N8 9DY
Proposal	<i>Rear Garden: General maintenance:</i> <i>T2: Mature Ash: Approximately 18.00m. Remove dead wood throughout the crown which is over 30mm in diameter or 1.00m in length. Reduce crown back to previous and most recent points of reduction up to approximately 2.20m. Thin density up to 20%.</i> <i>T3: Mature Sycamore: Approximately 14.00m.</i> <i>This tree is in decline. The canopy is now less than 30% leaf coverage and branches are blackening. Decline may be attributed to Sooty bark disease. Section fell to approximately the height of the fence (2.00m).</i> <i>T4: Mature Ash - (top left hand corner): Approximately 16.00m. This tree overhangs neighbouring property. Remove dead wood throughout crown. All dead wood over 30mm in diameter or 1.00m in length.</i> <i>T5: Large Laurel - (on right hand boundary): Approximately 6.00m.</i> <i>This tree has suffered greatly from heat stress. Several stems are now totally dead. Reduce crown by up to approximately 1.50m. Remove major dead wood.</i> <i>(Works to T1 Hornbeam will be considered separately under tree works application reference HGY/2026/2528, as this tree is protected by a TPO)</i>

RECOMMENDATION:	No Objection	
Application date	09/09/2026	
Tree Inspector	DM	Date: 1 st October 2026

Site

The various trees as listed, described above, and marked on the sketch plan are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Rear Garden: General maintenance:

T2: Mature Ash: Approximately 18.00m. Remove dead wood throughout the crown which is over 30mm in diameter or 1.00m in length. Reduce crown back to previous and most recent points of reduction up to approximately 2.20m. Thin density up to 20%.

T3: Mature Sycamore: Approximately 14.00m.

This tree is in decline. The canopy is now less than 30% leaf coverage and branches are blackening. Decline may be attributed to Sooty bark disease. Section fell to approximately the height of the fence (2.00m).

T4: Mature Ash - (top left hand corner): Approximately 16.00m.

This tree overhangs neighbouring property. Remove dead wood throughout crown. All dead wood over 30mm in diameter or 1.00m in length.

T5: Large Laurel - (on right hand boundary): Approximately 6.00m.

This tree has suffered greatly from heat stress. Several stems are now totally dead. Reduce crown by up to approximately 1.50m. Remove major dead wood.

(Works to T1 Hornbeam will be considered separately under tree works application reference HGY/2026/2528, as this tree is protected by a TPO)

Issues

I hold no objections to the reasonable, sensitive pruning works.

The specification is within standard good arboricultural practice and husbandry.

There is a duty to replace dead, dying, and dangerous trees in a Conservation Area.

Recommendation

No Objection
