Location: 15 Milton Road

2. EXISTING BUILDING

- The building is of an “L” shape in plan with the narrow part at the rear, with a small west facing garden.
- The frontage of the house is of four storeys, the top is within the mansard roof and the lower storey is of a semi basement.
- The rear of the house is of 3 storeys where the lower storey is at the garden level
- Access to the house is from the roadside and is stepped back from the road. Concrete steps leading up to the ground floor provide access to the main entrance hall. Concrete steps down to the basement provide access to the basement entrance.

2. EXISTING (continued)

Property comprises of a four storey Edwardian terraced house comprising of 2 x bedsits, 3 x studio flats, 2 x one bedroom flats. To be converted into 3 x 2 flats and 1 x 1 bedroom flat.

The house is of the split level type with the front four floor levels are 1.2m lower than the rear four rear floor levels.

Basement

- Existing basement comprises of a one bedroom flat at the front of the property. It is accessed via external stairs by roadside leading to the basement front door entrance (level1).

Ground Floor

- Main house entrance is accessed from external stairs leading up from the roadside to the hall entrance door. The Ground floor studio flat is accessed from the main hall. Stairs leading down from the main hall provide access to the garden room studio at lower level (level 2) at the rear of the property.

3. PROPOSAL

The proposal is to convert the existing into 3 two bedroom split level flats and the top floor into a one bedroom flat (not split level).

- Access to the Flats 1, 2 & 3 is from the main entrance hall. Access to the basement provided by existing steps down at the front of the house.
- The existing layout of the property is unviable as it stands. The owner resides in most of the front section and the remainder available for renting.
- Tenants are now hard to find for bedsits. They are unwilling to use shared communal toilet and shower facilities (the toilet is on a different floor level to the shower). As a result the bedsits have been empty for several years.
- The proposals to cut down the number of units from 7 to 4 by converting each floor into one flat will not only provide a better standard of life but will also provide space for family living.

3. DESIGN & ACCESS LOCATION (continued)

- The property is part of an Edwardian terrace spanning along both sides of Milton Road which has a one way traffic system.
- Houses along the “Miltons” are of similar Edwardian style with most having the same frontages.
- The terraced roads take on a ladder formation off the main road (Archway Road) and provide a village effect of tranquillity shielded from the hustle and bustle of everyday life in a city.
- A short walk to the main road (Archway Road) where buses provide a quick and reliable service to both North & South.
- Highgate tube station is 5 minutes walk away, providing Northern line services,

S&A Designs | ARCHITECTS

3. DESIGN & ACCESS LOCATION (continued)

- Shops & cafes along archway road provide a quick access to everyday needs.
- Highgate Village is within a 10 minute walk, where a wide selection of shops and facilities are available.
- “Highgate Woods” which runs along the back and side of the “Milton’s” is within a 5 minute walk. It’s facilities include a park café within the woods and large green space for cricket and other sport pursuits. The grounds facilitate natural habitats for different species of birds and other wildlife.

6. Conclusion

- Most of the properties in this road have been converted over the last 10 years into individual flats.
- The proposal is in keeping with surrounding neighbouring houses.
- There is no detrimental impact on the surrounding area (see photo's in section 6)
- No changes to front and rear elevation are proposed, hence both character and harmony along the terraces of Milton Road are not impacted.
- Therefore I believe that this proposal should be accepted on the basis that it provide a better quality of life for young families whilst having no impact at all on the immediate area.
