Site

The trees as listed above, marked on the sketch plan, and seen in the photographs, are situated in the rear and front garden of the property. They are not publicly visible to the rear.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1: Oak (16m): Crown reduce over garden by 2m to balance crown and prevent snap out

T2: Willow (8m): Pollard removing 2m of growth to keep tree at a size suitable for its location and as part of regular maintenance

T3: Willow (15m): Re-pollard to previous points removing 4m of growth to keep tree at a size suitable for its location and as part of regular maintenance

Issues

I hold no objections to the reasonable proposed pruning works.

The specification is within standard good arboricultural practice and husbandry.

The species generally respond well to such reductions and management regimes.

Recommendation

No Objection
