Site

The crab apple tree, as described above, and marked on the sketch plan, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

There is a crab apple in the back garden which has been reduced around 2 years ago, I'm suggesting a 1.5m reduction of over extending branches to keep the tree balanced and prevent any branches snapping out. There is also a pittosporum that will be lightly trimmed

Issues

I hold no objections to the proposed repeat reasonable pruning works.

The specification is within standard good arboricultural practice and husbandry.

The species generally responds well to such reductions and management regimes.

Recommendation

No Objection
