Importance: High

I am satisfied with the submitted details, please validate as a Five- Day Notice (FDN).

Dear Mr Parti,

A FDN is not permission or an exemption to fell without the authorisation of the Local Planning Authority first. The FDN acts as notification.

I will need to do a site visit. Mondays to Thursdays are good for me between 10:30am-2:30pm.

If you would forward some convenient times and dates, we can diarise.

Regards,

Daniel Monk

Senior Arboricultural Officer (Planning)

Subject: URGENT - Tree Removal / TPO - 13 Sheldon Avenue, N6 4JS

Dear Planning Team,

I am the homeowner and resident of 13 Sheldon Avenue, London, N6 4JS.

I am contacting you regarding a large Lombardy Poplar tree situated in the rear garden of my property, which I have significant concerns about due to its internal condition and potential safety implications.

I recently commissioned an independent arboricultural consultant, Kim Gifford, to carry out a specialist Picus Sonic Tomograph assessment of the tree.

The resulting report, dated 15 October 2026, identified 47% altered timber within the tested section of the trunk and concluded that the tree has extensive internal decay.

Following the assessment, the consultant has recommended complete removal on health and safety grounds, advising that this should be undertaken as soon as possible.

I have attached the full arboricultural report, including the test results and photographs, for your consideration.

In light of these findings, I would be grateful if the Tree Officer could urgently review the report and advise on the following:

1. Whether the tree is currently protected by a Tree Preservation Order or is within a Conservation Area.
2. What formal application or notification is required to obtain permission for its removal.
3. Whether the findings in the attached report provide sufficient grounds for urgent consideration.
4. Whether any further information or inspection is required from the council before removal can be authorised.

Given the consultant's recommendation on health and safety grounds, I would appreciate an urgent response.

Please could you confirm receipt of the attached report and advise on the next steps.

Kind regards,

Mr Vikki Parti
