HGY/2023/2673

Dear Sirs

I have received your notification entertaining requests to lop neighbourhood trees. I wish to object to this change of plans and further onslaught on the neighbourhood.

Fortuitously or not, the trees in question are amongst those that give residents visual relief from the constructions of Parham Way. These constructions were themselves contended planning in that they required (and secured) removal of trees and crass imposition of looming red-brick structures in a formerly wooded area. It is offensive to find the occupants of Parham Way now requiring further convenience at the expense of previous planning arrangements and the working of nature, presuming to enforce their pleasure at the inconvenience of others. The Parham construction has always been about the obliteration of nature and neighbourly compromise.

With the onset of autumn and the falling of the leaves, it is now possible to view the latest block exposed at Parham Way which perforce will prevail over nature during the leafless winter months. By the lopping of the trees & other 'adjustments' to the landscape residents will be subjected to the unsightly Parham Way year round.

I trust that the Council will see reason here and act on behalf of residents rather than late intruders

Yours faithfully

S.W. Massil

"Parham Way" is certainly not "Wood Green"!
