

Description of tree works

The photo below shows the tree from number 76 looking east. In other words it shows the tree along the fence. We are planning to remove the branch on the right which grows out from half the main trunk that has split which is the second element of the tree in the photo from the right. There is no work planned to the two main trunks of the tree. The branch is at the back of the tree looking from the two houses so will not alter the tree significantly looking from the owner's house at 74.

this
branch would
be cut at the
level of the bottom
of this photo.
