

## Product Information

Our Titania garden office range has a specification far better than any competitor. This office has a **secure 12-point locking system** and Wide Opening, **French Double Doors** with a **Tall Walkthrough Height**.

This range also features large, **28mm thick double glazed windows** with unique Dunster House Domestic Hinges along with Multi-Point Locking. Unlike some competitors, we use **polyisocyanurate insulation** in the walls roof and floor, not Rockwool or bubble wrap. We use polyisocyanurate as we feel its one of the best thermal insulators you can get.
