Site

The Leylandii trees G1, as marked on the plan and seen in the photographs, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

G1 Group Leylandiis, reduce height by 2-3 M and face up all sides to form a compact hedge.

Issues

I hold no objections to the proposed pruning works which is common practice. From the photographs the trees are out of scale to their immediate surroundings.

The works will allow future easier management to maintain as a hedge.

Recommendation

No Objection
