Site

The Lime *Tilia* trees T1 & T2, as seen in the photograph and marked on the plan, are situated in the rear garden of the property. They are publicly visible within the cul-de-sac.

Several site visits were deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 & T2 2 x Mature Limes: (Lapsed pollards): Approximately 12.00m: Re-pollard, reduce back to original pollard points at approximately 4.50m. Retain lateral and sub lateral growth between stems. Suitable for pleaching. General maintenance.

Issues

I hold no objections to the reasonable proposed pruning works to bring the Lime trees into a manageable regime to match their surroundings.

Lime trees generally respond well to such reductions and husbandry.

Recommendation

No Objection
