Planning Appendix

This Appendix has been written to support the Discharge of Conditions Application HGY/2022/3904 on behalf of Haringey Library Services for the Listed Building consent for internal and external alterations for Muswell Hill Library, Queens Avenue, Hornsey, London N10 3PE.

As part of the new glazed extension to the Grade II Muswell Library the front section of the existing one storey later side extension was partially demolished.

The side extension is thought to date from the mid-20th Century and is constructed primarily of London yellow stocks to the side and rear with red brickwork to the front to match in with the existing main library.

Front of side addition

Side constructed in different bricks

Existing and proposed bricks

Following the demolition of the front of the later addition to make way for the glazed extension, the only brickwork remaining in the existing wall is London yellow stocks. Given this, the decision was taken to source London yellow stocks that would match. These can be seen in the third photo above. The proposed mortar is 1:5 masonry cement to sand to BS EN 998-2 coloured to match existing.
