Site

The large mature Lime *Tilia* spp tree, marked as 1 on the plan, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Issues

I hold no objections to the reasonable repeat proposed pruning works to prune back to the most recent pruning points.

The specification is within good arboricultural practice and husbandry.

Lime trees generally respond well to such crown reduction works and restore their crowns over time.

Recommendation

No Objection
