Site

The Copper Beech tree T1, as marked on the plan and seen in the photograph, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Tree Number - T1

Tree Type - Copper beech (*Fagus Silvatica*)

Approx. Height - 16m

Location - rear garden right hand boundary

Service - Crown Reduction

Work Required - crown reduce back to previous pruning points by removing approximately 2.5-3m from height and 2m from sides.

Reason - as part of continued maintenance

Issues

I hold no objections to the proposed reasonable pruning works. The Beech tree has been sensitively and sympathetically reduced before.

Recommendation

No Objection
