| <b>Application type</b>   | <b>Conservation Area Notification</b>                                                                                                                                                                                                                                                                                                                           |
| <b>Site Address:</b>      | 8 Crescent Road, Hornsey, London, N8 8AT                                                                                                                                                                                                                                                                                                                        |
| <b>Proposal</b>           | Sycamore (T1) - Fell. There are two stems from ground level with a bark included union between them. The crown is sparse and the tree has been suppressed by the adjacent mature ash tree and the dense arboreal ivy. The tree has low amenity value and cannot be seen from the street. Replant with one deciduous tree eg Celtis australis or Acer campestre. |

|                         |                     |                                           |
|-------------------------|---------------------|-------------------------------------------|
| <b>RECOMMENDATION:</b>  | <b>No Objection</b> |                                           |
| <b>Application date</b> | 11/12/2023          |                                           |
| <b>Tree Inspector</b>   | DM                  | <b>Date:</b> 4 <sup>th</sup> January 2024 |

## **Site**

The Sycamore tree T1, as marked on the plan and seen in the photographs is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

## **Proposal**

Tree works proposed.

Sycamore (T1) - Fell. There are two stems from ground level with a bark included union between them. The crown is sparse and the tree has been suppressed by the adjacent mature ash tree and the dense arboreal ivy. The tree has low amenity value and cannot be seen from the street. Replant with one deciduous tree eg *Celtis australis* or *Acer campestre*.

## **Issues**

I hold no objections to the removal of the above sycamore and concur with the findings.

The tree has a tight included fork and is low grade.

The applicant and client intend to re plant with a suitable tree.

## **Recommendation**

**No Objection**
