Tottenham Hale Station	25 mins	1.1 miles
Tottenham Hotspur Football Club	34 mins	1.5 miles

Information based on data provided by google maps.

Health Benefits of Walking

- Walking is simple, free and one of the easiest ways to get more active, lose weight and become healthier. Sometimes overlooked as a form of exercise, walking briskly can help you build stamina, burn excess calories and make your heart healthier.
- You do not have to walk for hours. A brisk 10-minute daily walk has lots of health benefits and counts towards your 150 minutes of weekly exercise, as recommended in the physical activity guidelines for adults aged 19 to 64.
- The easiest way to walk more is to make walking a habit. Think of ways to include walking in your daily routine. Examples include; walking part of your journey to work, walking to the shops, using the stairs instead of the lift, leaving the car behind for short journeys, walking the kids to school, doing a regular walk with a friend, going for a stroll with family or friends after dinner.

2.0 | Travel Plan

2.1 Travel Plan

The Travel Plan has been developed in association with the operator(s) of Development. A Travel Plan is a long-term strategy for reducing dependence on travel by private car in favour of more sustainable modes of travel, which reflects current Government policy objectives in respect of transport and land use planning. Travel Plans are generally a requirement of planning for development schemes that are likely to result in a significant traffic impact.

The objective of the Travel Plan is to reduce private car mileage in favour of more sustainable modes of travel, which reflects current Government policy objectives in respect of transport. Travel Plans are supported by infrastructure provided as part of the built development and through the introduction of travel initiatives designed to provide residents with an alternative to the private car.

The preparation of this Travel Information Pack forms part of the Development's commitments. Additional features of the Travel Plan are:

- The provision of dedicated on-site cycle parking for use by residents and visitors; and
- The provision of a Car Club vehicle space within the development, for use on a short term hire basis. ZipCar have provided their own information recently concerning this service and plans are in place to allow residents access to registration.

2.2 Car Sharing

What is Car Sharing?

Car sharing (also called liftsharing, ridesharing and carpooling) is when two or more people share a car and travel together. It allows individuals to benefit from the convenience of the car, whilst reducing the costs and alleviating the associated problems of congestion and pollution.

Why should I car share?

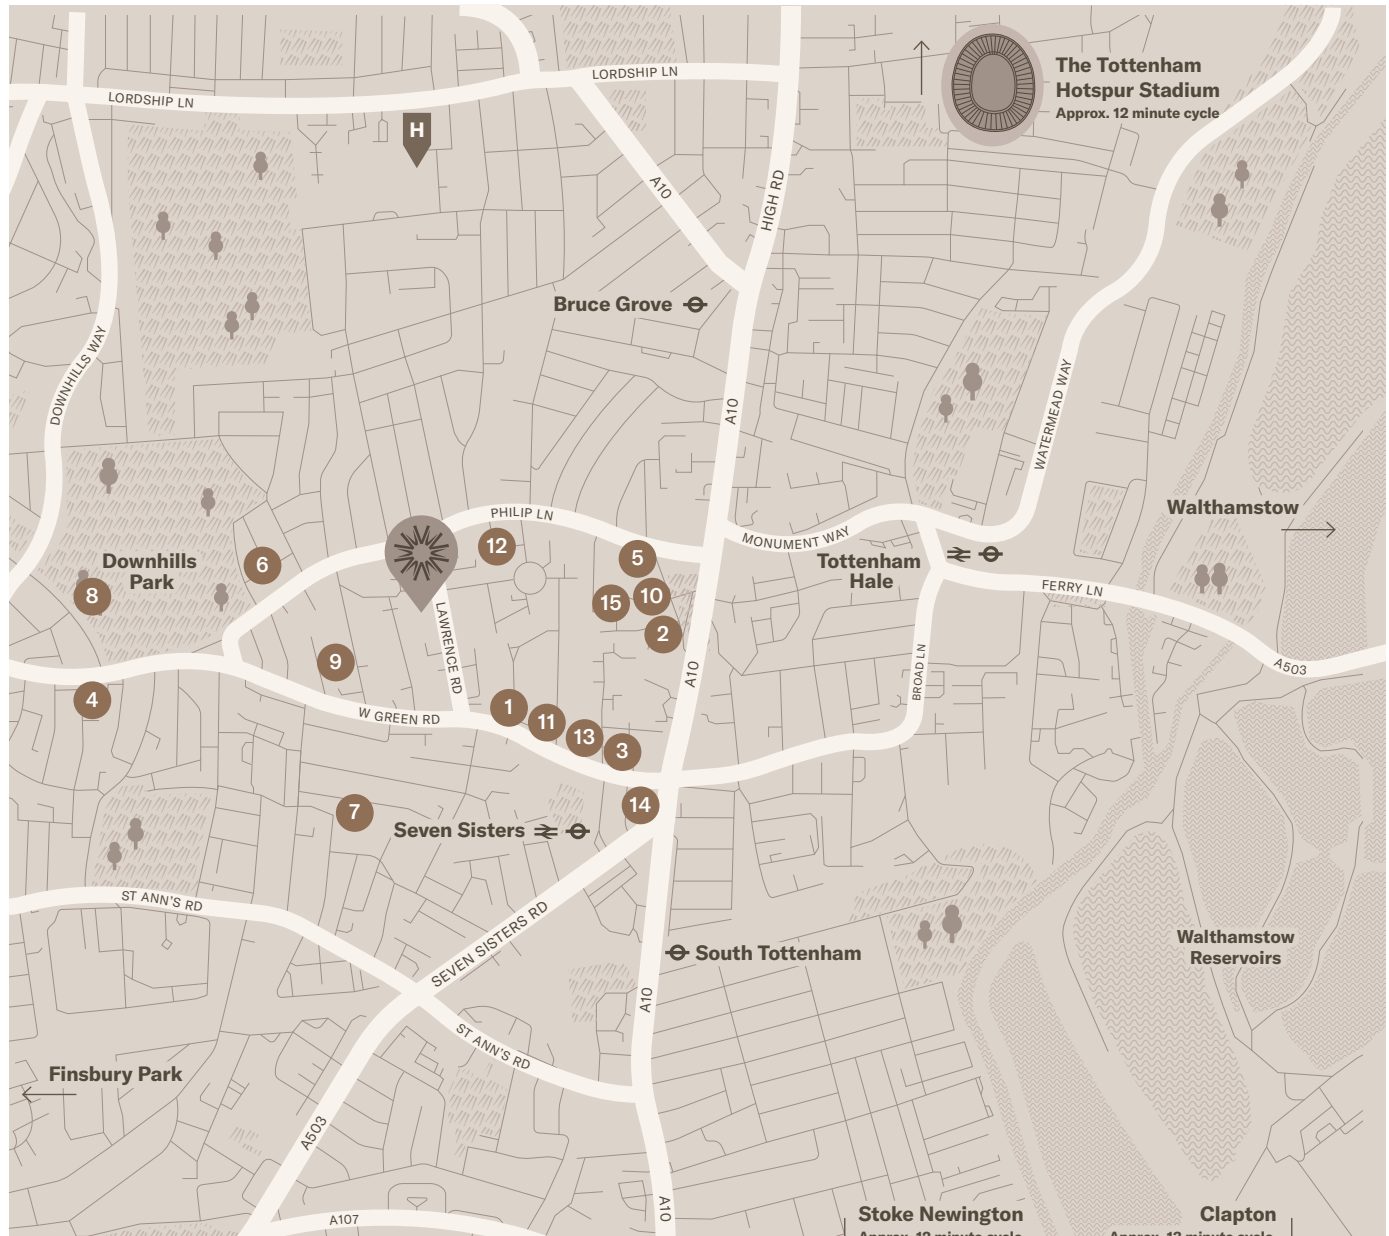

- Travelling in a pair or a group can often be more fun and better for individuals, the community and the environment. There are several reasons for this:
- It can save you money.
- It can reduce pollution from car emissions.
- It gives you company.
- It can reduce local congestion.
- It can save you time.
- Sharing a walking or cycling journey can motivate you to do some exercise.
- It can be safer (e.g. having company if you breakdown).
- You can make new friends and meet your neighbours.
- It can reduce the use of limited fossil fuels.

If you share your journey with others regularly, and share the cost of travel, then a saving in excess of £1,000 per year can be achieved. You can estimate your potential cost savings via the on-line cost calculator, provided by Liftshare <https://www.liftshare.com/calculator.asp?skin=10>

If you are interested in finding a car share partner, consider joining an existing car Share scheme such as London Liftshare <https://london.liftshare.com/>

2.3 Local Amenities

2.4 Cycle Storage

Security Access

All bike storage facilities are securely accessed through a minimum of two fob controlled doors / gates. Fobs will be allocated to residents **only** upon request and all storage spaces and routes to them are covered by CCTV.

Directions & Usage

Vabel Lawrence has multiple secure cycle storage facilities based within Red House and accessed via the communal courtyard.

Accessible bike storage is located at ground floor level and is accessed directly from the courtyard, this space includes tubular sheffield stands larger or hand controlled bicycles. All other bike spaces are located in dedicated basement bike stores for Red House (67) and Grey House (65) respectively and are accessed via the rear courtyard door and internal staircase (with bike rail) or by lift. These stores combine a mixture of two-tiered bicycle racks, sheffield stands and vertical cycle stands. For more information on bike storage types reference TFL's **London Cycle Design Standards**.
