Site

The Eucalyptus tree T1 is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1: Eucalyptus (12m): Pollard to 4.5m removing 7.5m of growth due to heavy lean into neighbouring property.

Issues

I hold no objections to the proposed pruning works.

The tree has an intrusive 45-degree lean.

Eucalyptus trees reduce, pollard and coppice generally well. They are fast growing and restore their crowns over a short period of time.

Recommendation

No Objection
