12a Addington Road, London N4 4RP

Dear planners

I would like to object to one aspect of the planning application for 10 Addington Road – the proposed erection of a rear infill extension at the back of the building. I own and live in the ground floor/lower ground floor flat at 12a Addington Road (next door to number 10, on the side of the proposed extension). My living room is at the back of the flat on the right hand half of the building and the only light into that room is from the backdoors (please see attached photo) (the other half of the ground floor is a bedroom). An infill extension coming up to my boundary wall will significantly reduce the light coming into my living room, resulting in light deprivation and making my living room very dark and gloomy. Currently, the space between the original side returns of 10 and 12 Addington Road is 5.30 meters. The proposed extension will fill in half of the space between the side returns, reducing the space to 2.65 meters. Thus the space providing the only source of light into my living room will be halved under these proposals and indeed the proposed extension will box-in my back door area. The deprivation of light into my living room, which is my main living space, will have a significant negative impact on my well-being.

Further, it is unclear from the plans whether a window is planned on the side of the proposed extension overlooking my property. A window in that position would have a view into my back doors and would result in a complete lack of privacy in my main living space.

I do understand the desire on the part of the new owner of the property to upgrade the property, but do not wish such works to have a detrimental impact on my living conditions. Please do contact me with any questions or for further information.

Best wishes

Milly Williamson
