Site

The mature Sycamore tree, as marked on the plan, and seen in the photograph (below), is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Large Sycamore - Reduce the height by 5-6m

Reduce the crown spread by 2.5m

Maintenance works in line with good arboricultural practice.

Issues

I hold no objections to the reasonable proposed pruning works to prune back to the purple line in the photograph below.

The Sycamore tree has been reduced before and has restored its crown. The tree is multi stemmed with tight included base forks. The reduction will benefit a loss of weight within the sail area.

The specification is appropriate for the tree above.

Recommendation

No Objection
