Site

The various six Cypress trees, as seen in the photographs and marked on the sketch plan, are situated in the rear garden of the property. They are publicly visible from Church Road N6.

A site visit was deemed necessary to determine the appropriateness of the proposed works (19/02/2024 at approximately 11:30am).

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

G1- Approximately six Cypress trees (18m)- reduce height by forty percent (6m) , prune back both ends and branches over garden by up to 2m.

Issues

I hold no objections to the reduction of the Leylandii trees.

The agent has confirmed that the reason for works is to allow more light into the garden. The trees are capable of growing heights between 15- 20m.

At present they are oppressive and to their surroundings.

The screen will remain, and the future management will be made easier.

Recommendation

No Objection
