Site

The group of five Sycamore trees, as marked on the plan and seen in the photographs, are situated in the rear communal garden of the Church property. They are indiscernibly publicly visible from the road.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Muswell Hill Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

G1 (group of 5 sycamore trees) reduce from 14m to 11m and reshape

Issues

I hold no objections to the reasonable proposed running works.

The specification is within good arboricultural practice and husbandry.

I am not sure if the applicant intends to girdle the ivy too at the base.

Recommendation

No Objection
