At present the height of the tree leaf branches are higher than the trunk. The tree borders the front drive of another property. There are no immediate signs that the tree is effecting other structures. However, if the tree was allowed to gain much more growth I believe the neighbouring building could be compromised.

Site

The Sycamore tree is situated in the rear garden of the property. It is publicly visible at the junction from Nightingale Road N22.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Woodside Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Issues

I hold no objections to the proposed pruning works.

The reduction will take the Sycamore's crown back to the most recent previous reduced points.

Sycamores generally respond well to such management.

Recommendation

No Objection
