Site

The Sycamore (SYC) tree is situated in the rear garden of the property. It is not publicly visible but amenity is enjoyed by the surrounding properties.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The tree is protected by a Tree Preservation Order (TPO)

Proposal

Tree works proposed.

Works to tree protected by a TPO.

1 Sycamore: Reduce by 30% approx. 3/3.5m from all aspects back to previous points of reduction to shape, remove dead weak and crossing branches

To contain and shape, outgrown location, shading gardens

Issues

I hold no objections to the repeat, reasonable, proposed pruning works, to prune back to the most recent previous points.

The tree is lapsed high pollard.

The specification is within good arboricultural practice, husbandry, and the works will bring the SYC tree back under good management.

SYC trees generally respond well to such crown reductions.

From the photographs, the tree is multi stemmed with concaved unions. There appears to be a constriction wound on the main stem just below the union.

Recommendation

No Objection
