Published 1896

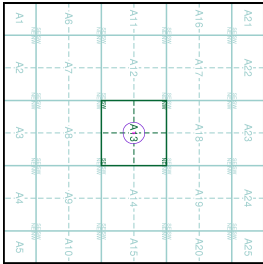

Source map scale - 1:10,560

The historical maps shown were produced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1858, all OS maps were based on the Cassini Projection, with independent surveys of a single area. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

● LANDMARK INFORMATION GROUP®

Published 1945 - 1950

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were produced between 1944 and 1951 as an interim measure, pending preparation of conventional mapping, due to post war resource shortages.

New section measures in the 1950's meant that every photograph was rechecked for potentially unsafe information with security sites replaced by lake fields or clouds. The original editions were withdrawn and only later made available after a period of 10 years although due to the accuracy of the editing without viewing both versions it is not easy to spot the edits. Where available Landmark have included both revisions.
