## **Site**

The mature Sycamore *Acer* spp. tree T2, as marked on the plan and seen in the photograph, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The tree is protected by a Tree Preservation Order (TPO)

## **Proposal**

Tree works proposed.

Works to tree protected by a TPO.

T2 - Mature Sycamore Tree, around 20 meters tall and spread of 14 meters looking to lighten up side laterals slightly where required helping to reduce weight from branches will be around a 2 meter reduction, ensure branches wont snap out if the coming future, (Works to T1 - Medium Size Cherry - will be considered separately under application reference HGY/2024/0257 as the tree is within a Conservation Area but not protected by a TPO).

## **Issues**

I hold no objections to the reasonable proposed pruning works.

The specification is within good arboricultural practice, husbandry, and standard.

Sycamores generally respond well from such sensitive reductions.

From the photographs, the tree is multi stemmed. It is not clear if the forks are tight, included or convex, at the base, but if so the reduction will benefit the crown sail area in relation to the external forces.

## **Recommendation**

**No Objection**
