Site

The Apple tree T1, as marked on the plan and seen in the photograph, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 - apple tree (7m) - reduce crown to previous pruning points, approximately 1m reduction, reduce height by approximately 2.5m and thin crown by removing crossing branches.

Issues

I hold no objections to the proposed repeat and reasonable pruning points.

The specification is within good arboricultural practice and husbandry.

Apple trees generally respond well from such pruning works.

Recommendation

No Objection
