Proposal

Tree works proposed.

(T1) - Sycamore - Tree is very large with overextended branches, limb towards house dropping to head height when in leaf and almost touching building. Branches are significantly overhanging neighbouring gardens, causing significant shading to multiple houses. Proposing to reduce entire crown by up to 3m in order to prevent failure of limbs and maintain trees form in current location and to remove lowest limb towards house (approximately 200mm diameter).

Issues

I hold no objections to the reasonable proposed pruning works.

The specification is within good arboricultural standard practice and husbandry (British Standard 3998 Tree Works 2010- Recommendations).

Sycamores generally respond well to such overall crown reduction works.

The reduction will bring the Sycamore tree into scale with its surroundings.

Recommendation

No Objection
