Proposal

Tree works proposed.

Works to tree protected by a TPO

Horse Chestnut (T1): Reduce eastern aspect of crown by 3-4m, selectively reduce over-longs to shape in remainder of crown (approx. 1-2m) and thin by 15% to mitigate windsail and excessive loading on eastern side which exhibits a pronounced lean in the same direction. Work is also to protect the health and stability of trees to be retained on the site, and to ensure that a satisfactory standard of visual amenity is provided and maintained. All specified work is within good arboricultural practice and husbandry.

Issues

I hold no objection to the reasonable proposed pruning works.

The specification is within good arboricultural standard practice, and husbandry.

By bringing the over extended branches in, and an overall reduction up to 2m, this will balance the crown of the leaning tree.

Recommendation

No Objection
