c/o Justin Brown
Native North Architects,
RE: 69 Grove Avenue,
London,
N10 2AL

Dear Justin,

We write to confirm we have been appointed as the structural engineers to undertake the structural design of the proposed works to the above address.

The project will be designed and monitored up until the end of Stage 5 of the RIBA stages by myself, Charlie Watts, and Martin Lambert forming Vesta Structures. Between us, we have chartership with a membership with the ICE and experience with projects of this ilk.

During the construction stage, Vesta Structures will be attending the site during critical phases of the subterranean construction. This will include, and not exhaustive:

- Review of the reinforcement for the first underpin
- Review of the reinforcement of remaining underpins
- Review of the underpinning of the majority of the basement
- Review of the installation of the majority of the steelwork

In addition to the site visits, Vesta Structures will be available over the phone, email and video calls to check on the updates of the projects. This will be liaised directly with the project manager of the construction.

Should any amendments be required following from a site visit or contact with project manager then this will be reflected by way of updates to the drawing packages.

I hope the above is to your approval. Should you have any questions, please do not hesitate to contact me via email or on 0798 563 4863 (Charlie Watts) or 07950473333 (Kanna Selvalingam).

We look forward to the prospect of working with you.

Yours sincerely,

Kanna Selvalingam MEng (Hons)
Director
