SYSTEM REF: Ss_30_40_30_42 THERMAL: To Achieve 0.1W/m2K NOTES: Roof to be a full and certified system from a single supplier. Refer to landscape architects drawings for locations of ecology features and green roof topography.	DISCLAIMER: 1. This drawing has been prepared for the sole use of the Stage 4 Technical Design and St Ann's Phase 1A noted down below and is limited to the scope and terms of KCA's appointment. 2. KCA shall not be liable for the use of this drawing for any purpose other than that for which it was originally prepared or for the modification or alteration of the drawing by others. 3. KCA own all intellectual property rights including any copyright contained in the design unless otherwise stated otherwise in our appointment. 4. Do not scale from this drawing. Refer to written dimensions only. 5. All levels and dimensions should be checked on site and any discrepancies notified to the architect prior to proceeding with any works. SUPPLEMENTARY NOTES: • This drawing and site boundary is based on survey information provided by others including site levels and topographical survey information prepared by Digital for and architectural information produced by others. KCA are not liable for any errors, discrepancies or omissions arising from this information. • This drawing should be read in conjunction with the relevant notes, drawings and supporting documentation produced by KCA and others including specification and all relevant health & safety and CDM information. • Information shown on KCA drawings outside the building footprint is indicative only. Please refer to Landscape Architect and Civil Engineers information for site levels and detailing of external landscaping. • MEP and structural items shown are indicatively only. Refer to MEP engineer and Structural Engineer's drawings and specification for this information.																																																				
REFERENCE	RF06 Ballast Roof, Inverted Roof Buildings C1, CX, DX, D3 - Roof Edge, Plant Zones	RF07 Ballast Roof, Inverted Roof Buildings DX -Stair Overruns	RF08 Concrete Paver Roof, Inverted Roof Buildings C1, CX, DX, D3 - Lift Overruns	RF09 Zinc Roof Buildings C1 - Stair Overrun	RF10 Ballast Roof, Inverted Roof Buildings C1, CX, D3 - Stair Overruns	NOTES 1. Please note that these drawings have been produced for 'Stage 4 Technical Design' information purposes only and should not be used for undertaking construction activities. 2. Please note materials which are part of the external wall should achieve A2-s1, d0 classification, notwithstanding permitted exclusions as identified in the Amended Regulations to Approved Document B. 3. All below ground works are shown indicatively only, please refer to structural engineer details and specification. 4. Please note that all waterproofing and tanking details are shown indicatively only. The Architect is not responsible for below ground waterproofing or tanking. Please refer to structural engineer / waterproofing specialist construction details and specification. The detailed waterproofing design (by others) should be designed by a Certified Surveyor in Structural Waterproofing (CSSW) as per hnhbc requirements. 5. All details and products must be installed fully in accordance with manufacturers requirements and be part of a warranted, tested and certified system. 6. Please note masonry support sizes and locations are shown indicatively. Please refer to S.Eng design and specification. 7. Please note that all fire stopping, including cavity barriers etc and fire performance is shown indicatively only and is the design responsibility of others. All fire design items and fire stopping should be installed based on construction drawings produced by the specialist firestopping subcontractor / designer. 8. Facade specialist contractor to determine suitability and compatibility of breather membrane and interface sealing membrane with fire cavity barrier certification, otherwise membranes to terminate before fire barrier.
