Site

The Lime *Tilia* spp. tree T1, as marked on the plan and seen in the photograph, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Reduce crown of lime (T1) back to previous cuts, approximately 2m off to allow more light into the surrounding gardens.

Issues

I hold no objections to the reasonable repeat proposed pruning works to reduces back to the most recent previous pruning points.

The specification is within good standard arboricultural practice and husbandry.

Lime trees generally respond well to such high pollard crown reduction management regimes.

Recommendation

No Objection
