## **Site**

The Cherry tree, as marked on the plan and seen on Goggle street view, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

## **Proposal**

Tree works proposed.

Cherry tree, reduction of crown by approx 30%

## **Issues**

I hold no objections to the reasonable proposed pruning works.

The specification is an outdated way of expressing works. Specifications for crown reductions are now done by overall reduction in height and reduction in laterals.

A 30% crown reduction would amount to overall reduction of 2-3m.

Cherries generally respond well to such pruning works.

## **Recommendation**

**No Objection**
