Site

The trees are situated in the rear garden of the property. They are not publicly visible.

The tree is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

Due to the minor nature of the proposed works and the level of detail submitted in support of the notification, a site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 Lime - reduce crown to most recent points of reduction (2m approx. branch removal).
Remove epicormic growth from trunk and prune clear of streetlight.

Issues

I hold no objections to the repeat reasonable pruning works to prune back to the most recent previous points.

The specification is within good standard arboricultural practice and husbandry.

Lime trees generally respond well to such reduction works.

Recommendation

No Objection
